

MOBILE Tips

FOR BUSINESS ON THE GO

More and more employees are taking their work on the go.

It's *No Surprise* that...

66% of all emails are read on a smartphone or tablet.

74% of companies allow employees to work on their own device.

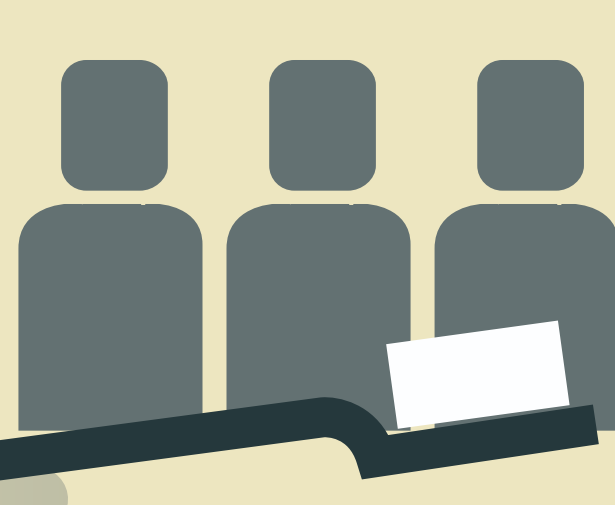

With that in mind, here are the top mobile tips for you to get your business done on your mobile device!

Safety Tips

FOR BUSINESS MOBILE DEVICES

73% of Americans are worried about smartphone security

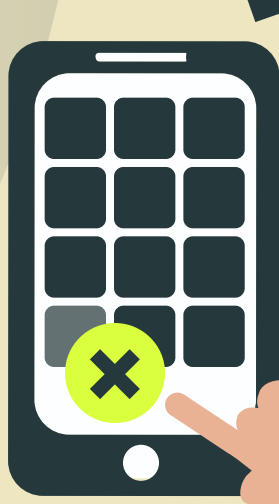

1/4 would rather share a toothbrush than a phone.

SAFETY TIPS

Lock your phone with a strong password

Less than 15% of smartphone users use biometrics, or fingerprint, logins

- Delete old apps you aren't using
- These apps store data and track location

BEWARE OF FAKE NETWORKS

Fake networks may take control of your phone. Connect to a Virtual Private Network

CONNECT TO A VIRTUAL

Private
Network

(VPN)

WHY?

VPNs = secure internet connection and data encryption.

VPNs help businesses when they're off site, without risking a security breach.

WHAT TO LOOK FOR IN A VPN

Make sure the VPN has servers in multiple locations

Know your provider's logging policies

Check for anti-malware scanners. Some VPNs offer help with anti-malware for downloads

Consistent across all devices

Best Mobile Apps
